

*Saint John's Health Center selects Healthtv and The Parent Channel*

*NEW YORK... May 2006...* The Health Television System Inc (Healthtv™ and The Parent Channel®) , the leading producer and provider of direct-to-patient television networks, today announced that Saint John's Health Center has selected Healthtv and The Parent Channel to educate patients and family members.

Saint John's patients and family members in Cardiology, Oncology, General/Medical Surgical and Maternity – including the Maria Shriver Nursery – will have 24 hour access to award-winning patient education television programming.

“We selected Healthtv and The Parent Channel because we believe that the focus, presentation and content create an effective and engaging learning experience,” Christine Maupin, CNS Critical Care at Saint John's Health Care.

“Key teaching and university-affiliated hospitals are implementing carefully chosen patient education to meet JCAHO standards,” says Kathy Kastner CEO of The Health Television System Inc.

The user-friendly television delivery provides basic and detailed educational content on both emotional and practical issues. Education is presented in a series of short, upbeat segments designed to enhance to the learner take-away through testimonials and shared experiences.

About Saint John's Health Center

A member of the SCLHM System, Saint John's Health System is ranked the number one community hospital in California, one of the top 25 hospitals and one of the top 100 orthopedic hospitals in the United States by HCIA-Sachs and the Human Motion Institute.

John's Health Center provides a full spectrum of treatment and diagnostic services in cardiac care, cancer care, orthopedics, labor and delivery, critical care and other specialties.

The 200,000-square-foot building is the first state-of-the-art medical facility to be completed in Los Angeles after the 1994 Northridge

earthquake. It is one of only a few hospitals nationwide with technology that will allow the hospital to remain fully operational in the event of an earthquake with a magnitude of up to 6.8.
